Subject: Call for 3D design hunt competition

National Youth Council along with Kathmandu University as its knowledge partner is planning to construct a state of the art National Incubation and Innovation Centre at Namobuddha Municipality, Kavre. The National Incubation and Innovation centre as per the Government of Nepal's fifteenth plan will be the house for incubating and innovating business ideas envisioned by the youth across the countries as well as a resource centre for future planning, policy making and research and development which will usher Nepal into 4th industrial revolution. In this context the premises of National Incubation and Innovation Centre is envisage to be futuristic and at the same time a traditional, making it a fusion of both past heritage and future aspirations of youth. In this regard a design competition of total prize money of 100,000/- NPR is being called among the students across the Schools of Kathmandu University for the same. The applying team will have to come up with 3D design of the proposed site and the best design will be awarded the prize.

All the interested teams are requested to apply by October 15, 2020 with their respective team name along with the names as well as roles and responsibilities of their team members. Since the final design should be environmentally sustainable, financially viable, structurally feasible and culturally sensitive, it is imperative that the applying team composition be multidisciplinary and comprise of students from engineering, environmental sciences, management and arts.
